# Mines of the County

Fred Stull and Henry Lovin are getting splendid ore on their lease on the Lucky Boy mine, at Chloride.

James Uncapher, owner of the famous old Keystone mine at Mineral Park, rendered service to the county this week as a grand juror.

- J. L. Witney, general superintentending to business matters.
- J. E. Rose, who is superintending operations near Temple Bar on a largé placer proposition, was in Kingman

James W. Guinn, who owns mining property in the Bonanza Wash section, is in Kingman. Mr. Guinn has been at work on his mines the past two months and reports them looking fine.

Robert Zuver, of Silver Creek, was a witness and juror at this term of court. Mr. Zuver is the owner of a group of mines in the Silver Creek section that will some day put him among the millionaire class.

On the 500 level of the Gold Road mine a great body of high grade mill ore has been encountered and stopes extraction. On all the levels good ore bodies have been opened up the past month.

Walter C. Fellows, superintendent of the Victor Gold Mining company, accompanied by Col. Thomas Ewing, was in Kingman this week, attending court. The company was defendant in a suit in which Carrow brothers recovered a judgement against it of 21328, on account of breach of contract.

Frank Dudek and Frank Sperl came up yesterday from the Copper World camp, where they have been building a wagon road into the mines of the Arizona-International mining company. They report the road almost completed. The mines owned by this company are proving up well and as soon as the hoisters have been put in comthe group will be gotten under way. the board of directors of the company. Kingman.

J. M. Rank arrived in Kingman a few days ago after a prospect trip along the Colorado river from Bulls Head to Parker. He was several months making the trip, but discovered nothing of importance.

W. H. Meals, who owns the Yellow Spar mine, near Silver Creek, in the San Francisco district, was in Kingman this week, in attendance on the District Court. The Yellow Spar dent of the McCracken mines, was in mine is one of the great veins of that Kingman a few hours last Saturday at- district and is destined to become a great producer.

The timbers for the Gold Bug shaft Thursday last on his way to Needles, the old shaft is now under way. It is all over the desert region. thought that the work will be completed within sixty days and that the work of sinking the shaft to a depth of several hundred feet below the present level will be gotten under way before the first of July.

A party of mining men are at the Sheeptrail group of mines, which are to be examined and reported on for a large capitalistic crowd in San Francisco. The men went in by way of Needles. The properties to be examined are among the largest gold bearing veins of the Union Pass section. The old Sheeptrail mines produced a will soon be opened for the purpose of large amount of gold a few years ago. while the Catherine mine, lying six miles west of the group, but owned by the same company, produced largely of gold and silver. The Catherine is one of the largest veins in San Francisco mining district.

Dr. A. L. Derbyshire, of Nome, Alaska, yesterday purchased of Chittenden and Buchanan a group of mines known as the Abe Lincoln group, five miles south of Kingman and about one mile north of McConnico station. The consideration is unknown, although a good sized payment was made on the purchase price. It is understood that a company is to be organized at once and work begun on the mines. An agreement was made as one of the terms of sale that a shaft would be sunk to a depth of two hundred feet at once. Dr. Derbyshire intends going mission the sinking of deep shafts on east at once to interest friends in the property, but will arrange for com-Mr. Dudek is attending a meeting of mencement of work before leaving

Work is still progressing on the big power plant and it is expected that the juice can be turned on by the first clopic mine to his home in Los Angeof July or sooner. The plant will be one of the most modern in the terri-

Dr. L. D. Godshall was a Kingman visited the mining property of the company at Cerbat and returned home Thursday evening. He informed us that the smelter at Needles was running and treating a large tonnage of ore. During his absence in the east the plant ran out of some necessary fluxing ores and was blown out, but as are being hauled to the mine from soon as he returned it was again blown Chloride and the work of timbering up in and will run steadily on ores from

> After years of wrangling and litigrtion the dispute between Charles E. Price and John Barnes over an interest in the Cleopatra group of mines was this week settled by Price deeding to Barnes a one-fourth interest in the property. Barnes claimed onehalf of the mines, but the claim was disputed by Price, resulting in a suit for a conveyance of the disputed ground. Now that a settlement has been made it is to be hoped that all the owners of the property will get together and open the mines up. The surface showing of the mines is the best in the south part of the county.

> The suit of J. H. Book against the New Comstock mining company, on account of commission on sale of that property to a party of San Francisco capitalists, resulted this week in a judgment for the plaintiff in the sum of 6,8408. Mr. Book was authorized to make the deal by the defendant company for a sum approximating 80,000\$. After a few payments had been made the intending purchasers went to Los Angeles and purchased practically all of the shares of the selling company in the open market, which purchase amounted to the actual taking over of the assets of the company, but at a much less figure than the original transaction contemplated. Book demanded his commission, but as the old board of directors had resigned as soon as their holdings were disposed of there was no one authorized to make good. After waiting two years Book brought suit and obtained judgment by

Stanley C. Bagg passed through Kingman early this week from the Cyles, where he will visit a few weeks.

W. W. Dunbar, formerly a resident attorney of Kingman, is in town, havvisitor this week from Needles. He ing just returned from a trip to the mines near the old McCracken. Mr. Dunbar is now a resident of Yuma.

Malcom McLeish, who at one time resided in this county, but now a resident of Denver, visited with friends yesterday and today. He is on his way to examine mining property west of Needles.

Fred Brown, Sam Settle and Walter Brown own a group of mining claims on the south end of the Wallapai mountains. Sample of the vein runs about ten dollars in gold and silver. The vein is about thirty feet wide.

Work is progressing on the 500 foot shaft on the Victor mine, two miles south of Gold Road. When the shaft has reached this depth it is purposed that the vein be fully exploited and should it bear out the prediction of the surface it will become one of the greatest mines in the county.

J. N. Cohenour and wife, of Stockton Hill, were Kingman visitors this week. Mr. Cohenour has been superintendent of the mines of the Arizona-Mexican M. & S. company the past two years, but recently he has been looking after mining interests of his

Victor C. Heikes, of the U. S. geological survey, was in Kingman several days this week gathering statistics relative to the production of the mines of this county during the year 1907. Mr. Heikes is one of the brightest men in the government service and carries with him a fund of useful information to the miner and prospec-

Tom Bosanko and Pete White came in from the Tyro group of mines a few days ago. They report that a fine showing of ore was recently discovered on the north end of the Tyro, samples from which run over fifty ounces in silver. This is the first silver ore found in the mines. The boys believe mineral belt of which Johannesburg is the Tyro is one of the best mines in the Blue Ridge Range.

## St. Gaudens Souvenir Coins.

One of the stories relative to the new gold coins designed and executed by August St. Gaudens was brought to Kingman by Victor Heikes, of the geological survey, who was in King-man this week. The design of the twenty dollar piece is much different from that of the five and ten, although all have omitted from them the legend of "In God We Trust." The ten dollar piece shows the eagle about to rise in flight, but the twenty dollar piece shows the eagle in full flight. The St. Gaudens souvenir twenty dollar piece has a raised milled edge with raised die, while the coin for general circulation has a sunken die and smooth edge. Only ten thousand five hundred of these souvenir coins were struck at the Philadelphia mint. Some of them got into general circulation and not knowing that they were for souvenir purpose a protest was at once raised against them on the plea that they would not stack and were therefore hard to handle in a large business way. This is the first time an explanation has been made of this new coin, not even the magazines having been aware of the fact, although they gave minute descriptions of it when the design was first executed.

Jenkins and Tregarthen's rich strike in Mint valley continues to attract attention and to improve with depth. The shaft on the Lone Tree mine is the one in which the strike was made. When the shaft was 60 feet deep the rich pay streak was 13 inches wide. The shaft is now 95 feet deep and the pay streak is 14 inches wide and is said to be richer than ever, some of the ore carrying values as high as 4008 to the ton and all of it showing well in gold visible to the naked eye. Mr. Jenkins brought in some of the ore yesterday in which, it is stated, pieces of gold as large as a pea can be seen. The property is located 15 miles west of Prescott and near Granite mountains. -Courier.

The gold mines of the Transvaal produced in 1907, 136,750,006\$ worth of gold. With the exception of 5,000,0008, this amount was produced from the the center, showing the comparatively restricted territory that is producing the gold of the country.

San Francisco Mining District, Mohave County, Arizona.

The properties of this Company are on the east end of the Famous Gold Road Lode, from which the Gold Road Mining & Exploration company has taken millions of dollars in gold We have 3,000 feet of this mammoth vein, which we purpose developing, and are now offering a limited number of shares to the public at 5c per share. No certificate will be issued for less than 500 shares. Every dollar obtained from stock sales will be conscientiously expended in development of the mines and betterments. There will be no expensive management to maintain; no elaborate prospectus to pay for, nor do we intend to spend one dollar on reports of high-priced experts. We have a splendid surface showing and have exposed the vein in a number of places. We want to further establish the value and extent of the ore bodies.

# Only a Limited Number of Shares Will be Sold at 5c per Share Take a Flyer in this Stock It will bring you a Fortune
